

How Centriq Can Increase Your Inspection Business

Every one out of two homes in the US has at least one recalled product in it.

But because the recall system is so broken, most consumers never find out about recalled products and live with dangerous goods in their homes.

U.S. CONSUMER PRODUCT SAFETY COMMISSION

RESELLERS GUIDE TO SELLING SAFER PRODUCTS

If you are in the business of reselling products, you are expected to know the laws, rules, and regulations that apply to your business, including whether a product you are selling has been recalled for a safety issue.

It is illegal to sell any recalled product.

It is also important to know that it is illegal to sell a recalled product, and that includes products in houses for sale, so knowing about recalled products in the home can be important in the buyer's negotiations for the home purchase.

U.S. CONSUMER PRODUCT SAFETY COMMISSION

RESELLERS GUIDE TO SELLING SAFER PRODUCTS

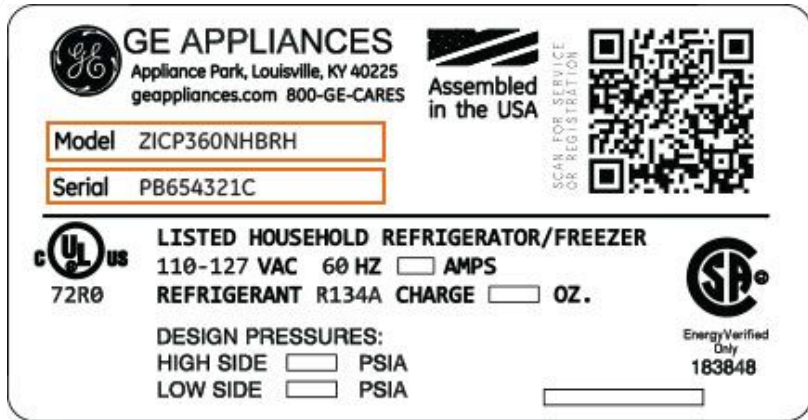

If you are in the business of reselling products, you are expected to know the laws, rules, and regulations that apply to your business, including whether a product you are selling has been recalled for a safety issue.

It is illegal to sell any recalled product.

You can see that a recall check is an add on to the home inspection that can be of great benefit to the buyer.

CENTRIQ

In Centriq, you take a photo of the product label that shows at least the model number.

With that photo, Centriq can recognize the product and the product category.

CENTRIQ

Centriq checks the **CPSC database** to find out whether or not the product is recalled based on the model number.

Instant recall results
on 75 - 80% of appliances

If the product is not recognized and/or it is not already in our database it may take a bit longer to process the item.

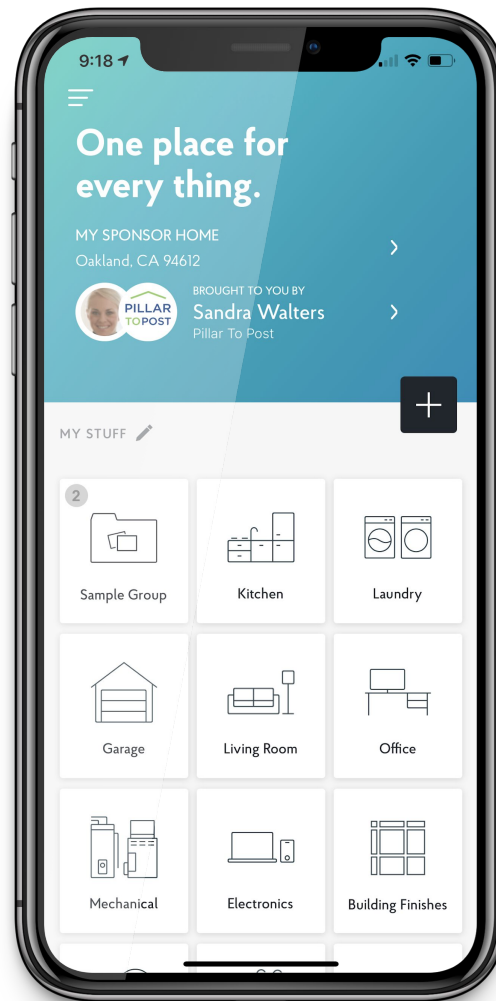

Unknown products go into a queue for a human to review and find the information.

This is typically complete within 24 hours

After the product is recognized, Centriq goes beyond checking for recalls.

Centriq comes with an app which you hand over to your customer and the app provides product manuals or other documentation that would have been in the box when the product was purchased.

The app also provides links to advanced parts for products.

Important replacement parts for new homeowners include replacement filters for refrigerators and air conditioners, but the app also provides other parts such as drawers and shelves, replacement dishwasher baskets, and so on.

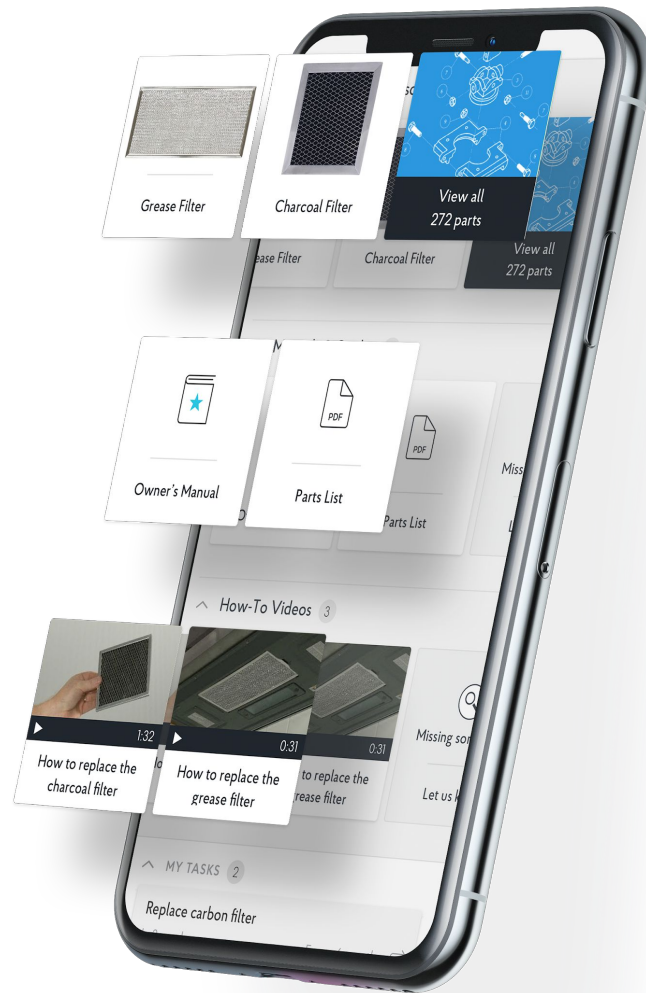

Centriq has a partnership with a parts supplier that is focused on service technicians so we have those advanced parts available through the app for the general consumer or DIYer.

These are parts that are sometimes not even available at the hardware store.

Next, the app tells the user
HOW TO troubleshoot, fix and
maintain the items using how
to videos.

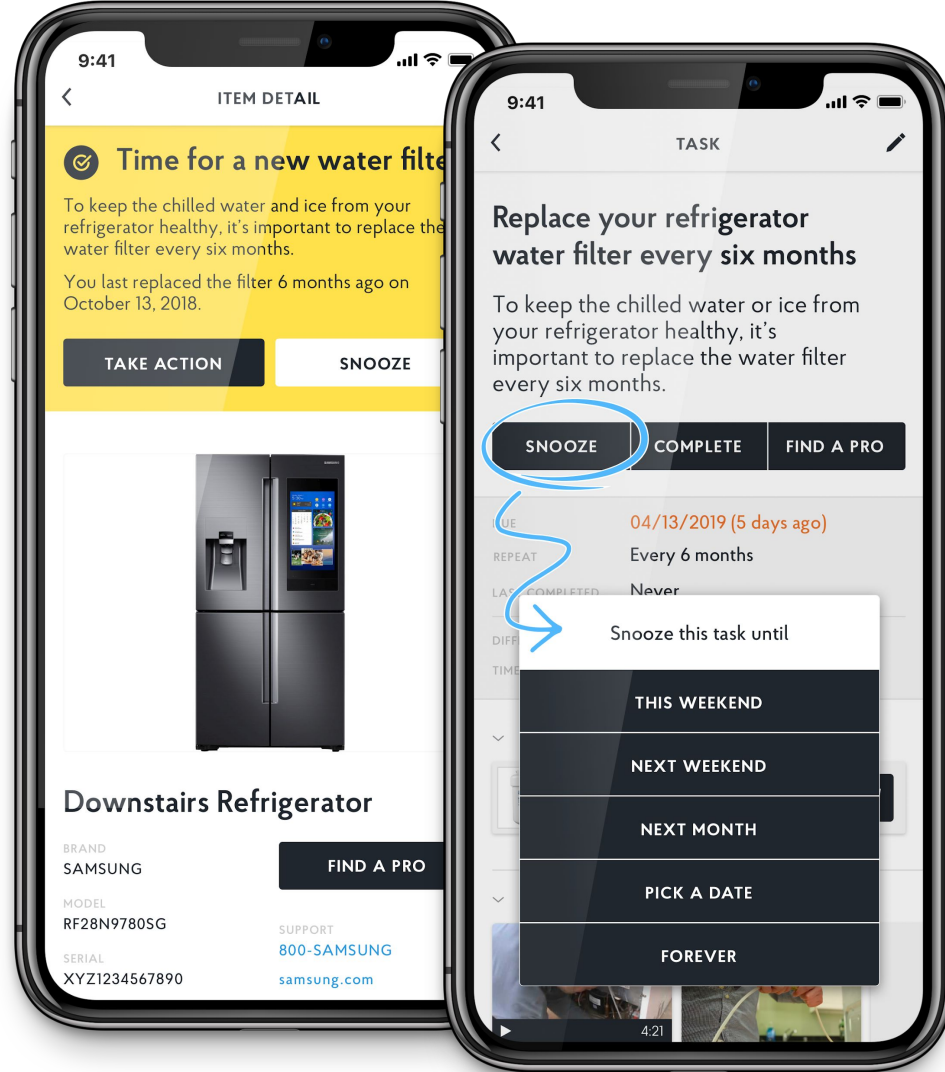

4,000,000 Parts + Supplies
450,000 + Products
325,000+ How-to Videos
400,000 + Manuals
12,000 + Brands
And Counting..

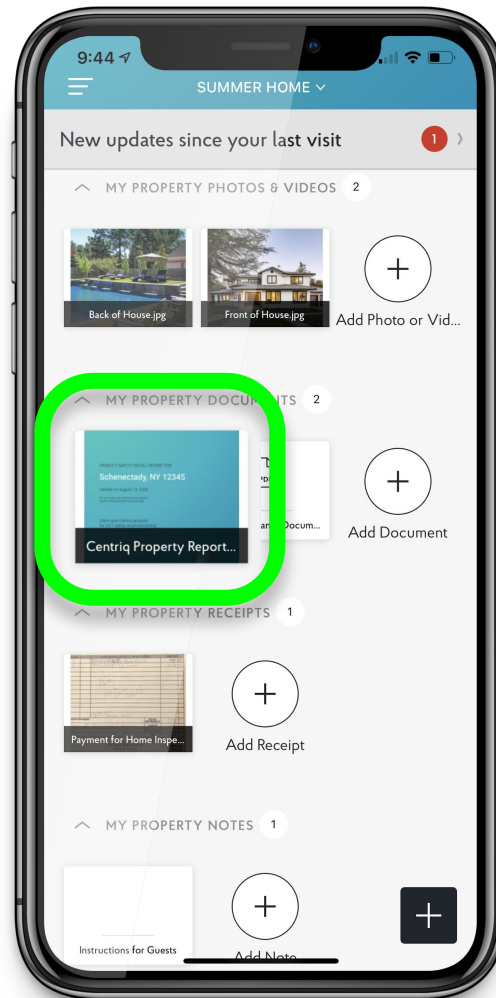

The Centriq database includes nearly half a million products, and if a product is not already in the database when the product is added, our system goes out to find the information to add it. This works for new and old products. If it has an internet presence, Centriq can add it.

Users can create reminders and maintenance tasks, and Centriq adds default reminders for tasks such as replacing the refrigerator filter.

Users can also add their own content.

For example, the app is a great place for clients to upload documents related to the home sale or keep track of redecorating ideas and materials or the new appliances that they be ordering prior to moving in.

Recall notifications appear in the app

If your client accepts the Centriq account, the Centriq property recall report is included as a document attachment inside the account. It is also delivered as a PDF via a separate email if they decide not to accept the Centriq account.

Any recalled items are also flagged inside the app with links to take action.

Centriq is much more than recall monitoring

- Digital user guide for the home
- Start their home inventory
- \$59.95/year value - Given to the client at no cost to them for the first year

FAQ: How much does the report cost inspectors?

A: \$17.95 per report.

Your client keeps the app long after the home sale

- No hassles to renew or cancel!!
- If they choose not to renew, they keep what is in the app, they just get limited by features

If the client adopts the app

- They can add more items
- Continuous recall monitoring added for any additional items in the app

The nice part about the app for your business, in addition to creating more value for an upgrade, is that it comes with your brand which is displayed on the home screen and in any communications sent from Centriq.

Your client receives email if:

- there is a recall notification
- there are any new items added in the app
- when item information is updated in the app
- when they maintenance reminders that are due

All of these communications display your brand.

Note - we do not use or sell your client's email for marketing purposes.

Item Details

The "expected useful life remaining" shown below for some items is what we estimate to be typical for most products of its kind and is provided as a guideline only. This may vary depending on use, maintenance, repairs, and other circumstances. A recall may also significantly impact this life expectancy, depending on the severity of the recall.
